This is my first time using any sort of card design software and was excited to try this out. This software was simple to use and had all the features I needed to create my card. Md. Zamunur Rahman 01/27/2012 01:26am The software is a great help in creating birthday invitations, birthday cards and similar things. I spent a long time with the software and found it was very useful in my business. But it left a lot to be desired. So I would suggest you to remove the email entry field to save the space and give a page space. It is a good software but I am not satisfied with the quality of this software.
